

EXPLODING COKE®

METHOD

ACTIVITY

- 1** Invite several members to help out with the demonstration.
- 2** Give each member a well-chilled 12 oz. can of regular Coke®.
- 3** Instruct members to vigorously shake their can.
- 4** Now, instruct members to snap the side of the can with their finger.
- 5** Turn the can a quarter turn and snap again.
- 6** Snap the side of the can at least 15 times before opening it.
- 7** Here's the true test—have them open their can. Assure them that they have knocked the bubbles off the side of the can so it won't explode when opened.

You will need...

- Chilled 12 oz. can of Coke® for each member
