

LATHER UP!

METHOD

- 1 Cut a fresh bar of Ivory Soap® in half.
- 2 Place one half on a paper plate and place it in a microwave oven.
- 3 Microwave on high for 2 minutes.
- 4 The soap will begin to expand as it heats up.
- 5 Carefully remove the foamy soap and let it cool.
- 6 Invite your members to touch the soap while it is still warm.

A fun way to get members to wash their hands before eating a snack.
